

Facing the Crisis

Reasons for Hope

"The next 10 years may be the most important in the next 10,000 years — the best chance our species will have to protect what remains of the natural systems that give us life."

— Sylvia Earle

Hosted by Dr. Susan Shaw, Dr. Sylvia Earle, Dr. Nancy Knowlton, Dr. David Gallo, Dr. David Guggenheim, Mr. Jim Fowler

Monday, December 7, 2009

Reception at 6:00, Forum 7:00-9:00

Limited seating – reservations strongly recommended 212.628.8383 or email reservations@explorers.org

Please join TED prize recipient and leading oceanographer Dr. Sylvia Earle at the Explorers Club for a discussion on how we can and must save the world's most crucial natural resource — the living ocean — while there is still time. Last March, a panel of top scientists led by marine toxicologist Dr. Susan Shaw and Dr. Earle came together to convey a powerful message about the enormity of the crisis facing the world's oceans at the first State of the Oceans Forum. Now, these Explorers return for a follow-up forum about the innovative solutions, leadership and resources required to make a difference for future generations.
